

Award Winning Excellence

Landmark Builders is an 8 time NARI CoTY (Contractor of the Year) Award winner. This year they won awards in two categories: Residential Exterior Under \$100,000 and Residential Exterior Specialty. They have completed some truly remarkable projects. The home pictured won the 2009 CoTY Award for the "Entire House Over \$1 million" category.

This home was completely renovated after a fire did significant damage. The home was rebuilt using the same foundation with alterations. The original home was two stories with an RV garage adjacent to the main house. The home owners wanted the new house to be a single story with a family wing including their children's bedrooms near the master bedroom. With limited space due to setbacks, Landmark was able to incorporate the RV garage foundation into the living space using an innovative raised floor system. The design included 5 bedrooms and several open entertainment areas including a media/game room and a magnificent Victorian style hotel bar area. A truly unique atmosphere is created by a wine cellar with a front row view through a glass window from the formal dining area. The designer kitchen, which would make any culinary professional envious, flows directly into either the bar or the formal dining room. This home is filled with attention to detail that comes only with using the right builder such as an Award Winning Custom Home Renovation Specialist like Landmark Builders.
